To Whom It May Concern:

I am against you regulating our air and changing it to class 1. We need to attract more jobs and people in our towns as well as have less regulation! This is too much!

As a Pend Oreille resident and voter, I am completely against your air quality proposal. You would severely damage our potential economy.

Sincerely

I'm a pend oreille county resident and THANK YOU for taking the lead on preserving our air and environment for future generations. I'm all for the restrictions and changes. Thank you for being an excellent steward of this beautiful land that I happen to be a guest in. You have my support.

Sincerely,

I am opposed to the Tribe's requesting that our area be designated a Class I clean air area. I believe that the smelter is going to be built in Addy and that more government regulations are the last thing that Pend Oreille County residents need or want .

Thank you.

Subject: Class I air quality redesignation

To whom it may concern at the Kalispel Tribe,

I am writing this letter to express my opposition to the proposed redesignation to a Class I air quality area for lands within the exterior boundaries of the Kalispel Indian Reservation. Upon reviewing the Technical Report prepared it seems the justification for the change is inadequate. The Report states that data is limited, and that the data used does not come from areas reasonably similar to the Reservation (monitoring stations in Tacoma Creek and the town of Newport specifically). How does it make good sense to propose a change based on data that doesn't represent the conditions of the area being proposed for a change? There does not appear to be sufficient information to demonstrate clearly that air quality above or adjacent to the Reservation is of concern; in fact, the Report states that the area is considered to have "good" air quality, with no real justification that more stringent air quality standards are necessary. The Report did not adequately disclose that air quality is degrading or that the proposed change will result in increased air quality.

The proposed change does not appear to provide any tangible benefits to Tribal members or members of surrounding communities within the reasonably foreseeable future, therefore I cannot support such a change. Thank you for your time.

Regards,

Subject: Clean Air Act Comment

Dear Tribe,

I watch your actions to protect your lands, air and water, and know that those also affect us who live nearby, but off your lands. You have my admiration and backing in your endeavors that will have far reaching results. We all need clear lands, clean air, and clean water.

Thank you for working on my behalf, neighbor,

Subject: Clean air

I am for clean air but not for any restrictions this puts on any business, anything or anyone not living on the kalispel reservation.

I have seen these types of restrictions hurt my extended family in Oregon and give the federal government a foothold to policing unconstitutional laws on tribal lands.

Subject: comments on air quality petition

To Whom it may concern:

If the Kalispel Indian Reservation wants to change the air quality designation from class 2 to class 1, let them do it in the area of their Reservation only. They have no right to impose such changes to affect the communities around them. Why should a handful of people adversely affect over 200,000 innocent people in the surrounding areas who probably know nothing about the proposed changes. The impact of these changes on industry in the area could cause employers to move their operations to other areas because of government regulations, thus causing lost jobs, greater unemployment, and ultimately higher taxes for everyone in the area to compensate for needed services. Many areas affected by this proposed redesignation are rural farm areas that rely on being able to use some of the industries in the region for their operations. We do not need or want more government regulation in the region.

Please leave the redesignation from class 2 to class 1 to ONLY the reservation if they so desire. Do not impose it on surrounding areas. If you are really interested in the voice of the people, make this known to people and more readily accessible for comment to those impacted than having the hearing in Cusick and at such a short notice.

Sincerely,

(b) (6)
